

# ELE101 2425-Spring Week-3

Murat Sever  
ytregitim@gmail.com

January, 2025

# Outline

- Quick review of last week
- git review
- Entrepreneurship
- Presentation example

# Key Points to Remember

Some important points about the course

- Always bring your laptop to class
- Every user must have an account on [GitHub](#)
- Make installments required for the course into your laptop ASAP
- Check your TOBB ETU e-mail for any updates!
- Do not forget to sign in the attendance list!
- Common time for compensation?

# Last Week

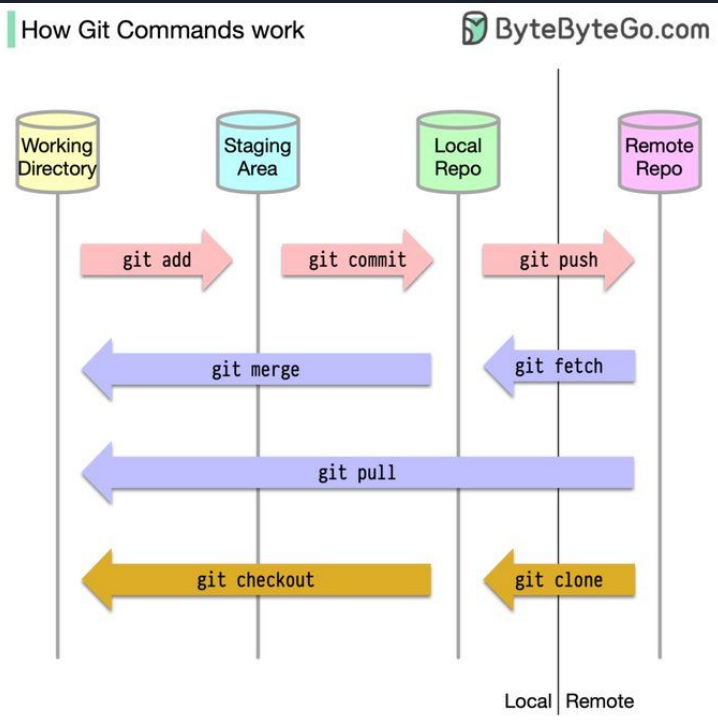

- Slides: <https://github.com/ELE101-2425Spring/Week-2>
- We have learned
  - how to use git from command prompt
  - git commands: clone, status, add, commit, push
  - Linux commands

# Git

- Git CMD or Git BASH
- git config needs to be done only once
- Always check with git status first!
- 3-stages
  1. Working directory
    - `git clone your_repo_name`
  2. Staging Area
    - `git add .`
  3. Repository
    - `git commit -m "your message"`
- Remote (server) update
  - `git push`

# Git

# Installation

- clone Week-3 repo into your PC
- change to your local directory (using cd command)
- Follow instructions in the README file

# How to use conda environment

- launch miniforge prompt
- conda env list
- conda activate ELE101
- jupyter-lab

Thanks!
